

# AESTHETIC SCIENCE

## Get Energized, Younger-Looking Skin

The Fountain of Youth Treatment is an exceptional approach to healthy, glowing skin. It is a two-step treatment using the ultrasonic machine and an enhancer to brighten and nourish cells. The new Youth Restore Growth Factor Serum is applied to keep cells from aging. There is no down time and you can apply make-up immediately following treatment. You can go out for the afternoon or evening, glowing and looking years younger. A series of treatments is suggested for lasting, long-term effects.
